This low literacy diabetes education tool was developed for use with patients of the Virginia Garcia Memorial Healthcare Clinic. Images in this handout may be subject to copyright and further use of this material may require permission of the copyright holder.

Low Blood Sugar

If your blood sugar drops **below 70** or your meter says **Lo** you may feel the following symptoms:

shakiness

rapid heart
beat

dizziness

hunger

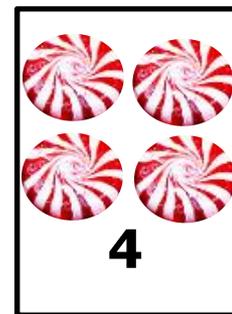

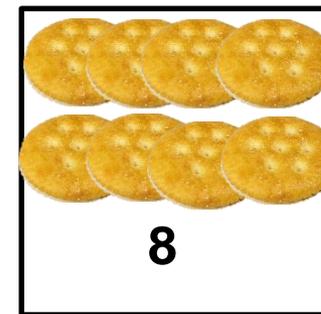

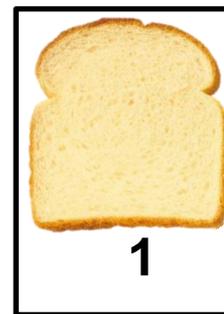

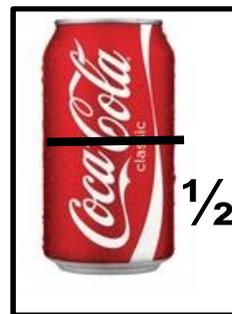

sweating

confusion

What to do?

- To feel better and avoid fainting eat 15 grams of carbohydrate.
- Lots of foods are carbs and all carbs will increase blood sugar. Below are some things that have 15 grams of carbohydrate.

- Check your blood sugar again in 15 minutes. →
- If it is still below 100, then eat another 15 grams of carbohydrate.
